

ABOUT GSA AUTOMATION:

GSA Automation is an engineering company specialized in industrial automation, complex system integration, and industrial infrastructure installation, including special-purpose machines and production lines.

The company operates in Africa, Europe, and internationally.

We modernize and optimize your installations, ensure compliance and safety, and provide support and maintenance, guided by our core values of transparency, trust, and responsiveness.

OUR SECTORS:

- Food & Beverage Industry
- Pharmaceutical and Cosmetic Industry
- Oil & Gas.
- Cement Industry and Quarries
- Wastewater Treatment
- Paper, Plastics & Rubber Industry
- Railway Transportation
- BMS / BAS

Multi-brand expertise:

SIEMENS

EMERSON

BECKHOFF

Allen-Bradley

OMRON

DELTA

**Rockwell
Automation**

**Schneider
Electric**

YOKOGAWA ◆

OUR SERVICES :

01 Automation & Control Systems:

- Industrial PLC programming (Siemens, Schneider, Allen-Bradley...).
- DCS integration (DeltaV, PCS 7...).
- HMI / SCADA development (WinCC, Wonderware, Ignition...).
- Drives & Variable Frequency Drives solutions (VFDs, Siemens, Schneider, ABB...).
- Design and integration of industrial networks (PROFINET, Modbus, Ethernet/IP...).
- Installation and calibration of measurement and control instruments (pressure, temperature, flow...).
- Migration of legacy PLC and automation systems
- Telemetry & monitoring solutions (Talk2M, IVTracer).
- Implementation and commissioning of BMS / BAS systems.

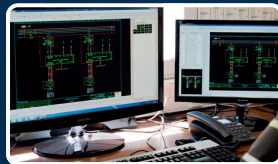

02 Installation & Commissioning :

- Electrical, mechanical, and pneumatic installation.
- FAT & SAT execution.
- Commissioning: start-up, tuning, and optimization.
- Technical deliverables: documentation, reports, certificates...
- Personnel training.

03 Engineering & Technical Studies:

- Feasibility analysis and system sizing.
- Design of electrical schematics / P&IDs and bills of materials.
- Control system architecture design.
- Equipment selection and specification
- Preparation of technical documentation: functional analysis (FA), specifications, test reports....
- Process simulation and validation.
- Budget studies and project cost estimation.

04 Maintenance & Troubleshooting:

- Preventive and corrective maintenance.
- Automation and electrical diagnostics & troubleshooting.
- Instrument calibration.
- PLC and HMI/SCADA software updates and optimization.
- Performance analysis and improvement recommendations.

05 Integrated Solutions & Custom Manufacturing :

In collaboration with our partner, we are committed to:

- Designing and custom-manufacturing industrial process equipment (piping, skids, conveyors, stainless steel / carbon steel tanks...).
- Upgrading and optimizing refrigeration/HVAC systems and gas/chemical equipment.
- Ensuring installation and stainless steel welding of equipment.

OUR PROJECTS :

Turnkey Project : Automated LNG Station for Trucks:

Design, fabrication, installation, and commissioning of a fully automated LNG station in Poland. The solution includes tank management, pumps, and safety systems, as well as an intuitive user interface and SCADA supervision for both local and remote operation.

EPC Project – Boiler House Modernization:

Replacement of the old coal/oil boiler house with a hybrid biomass/LNG installation, under an Energy Performance Contract (EPC). The project contributes to the decarbonization of the site and improves its energy efficiency in France.

Construction of an LNG Bunkering Transfer Manifold – Netherlands & Belgium.

Turnkey Food & Beverage Projects:

For each of these projects, we managed all phases of work, from machine reception to full operational commissioning, in Algeria.

Pharmaceutical & Biotechnology Projects:

We have modernized and optimized multiple production systems in Algeria and France.
